**Subject: TAKE STRONG EARLY ACTIONS TO REDUCE GREENHOUSE GAS POLLUTION**

**Comment:**

\* Californians support bold action to combat global warming pollution;  
\* The whole world is watching the Air Board to see whether it is willing to take enforceable steps now to implement California's historic global warming law;  
\* We urge the Board, specifically, to adopt early action measures to:  
1. Reduce diesel emissions from heavy-duty trucks;  
2. Require ports to provide shore-side electrification to vessels;  
3. Require cement factories to use energy more efficiently.

These measures will both reduce greenhouse gas emissions and protect public health by reducing toxic air pollution.

Subject: Reducing Emissions

Comment:

Thank you for the opportunity to comment on this important issue.

Please strengthen AB32 by adding provisions to:

- Reduce diesel emissions from heavy-duty trucks;
- Require ports to provide shore-side electrification to vessels;
- Require cement factories to use energy more efficiently.
- Provide Firm Deadlines and Commitments for Measures Contained in Tables 2 & 3

Please take a leadership position by implementing the boldest possible measures. There is no time left for moderation in this matter.

Sincerely,  
Phyllis Elliott

Subject: Stronger action on global warming  
Comment:

Dear members of the Air Resources Board,  
I'm writing to urge you to take stronger action in the initial implementation measures to reduce California's global warming impacts. Strong action is urgent in the face of accelerating climate change.

Please include the following:

1. Reduce diesel emissions from heavy-duty trucks;
2. Require ports to provide shore-side electrification to vessels;
3. Require cement factories to use energy more efficiently.

The world is watching!

thank you,

-Rafael Reyes

Subject: AB 32  
Comment:

As a proud citizen of California, the state that is taking the lead in saving the earth's climate for future generations, I urge the Air Resources Board to take stronger action than what is being proposed to enforce AB 32 by adopting at least the following steps.

1. Reduce diesel emissions from heavy-duty trucks;
2. Require ports to provide shore-side electrification to vessels;
3. Require cement factories to use energy more efficiently.

These measures will both reduce greenhouse gas emissions and protect public health by reducing toxic air pollution.

Sincerely,  
Phyllis Michel  
Mountain View, CA

Subject: Combat Global Warming / Improve Air Quality

Comment:

Californians support bold action to combat global warming pollution. The whole world is watching the Air Board to see whether you are willing to take enforceable steps now to implement California's historic global warming law.

Please adopt early action measures to:

1. Reduce diesel emissions from heavy-duty trucks;
2. Require ports to provide shore-side electrification to vessels;
3. Require cement factories to use energy more efficiently.

These measures will reduce greenhouse gas emissions and protect public health by reducing toxic air pollution.

Subject: Please approve strong early actions for AB32

Comment:

Thank you for your leadership on global warming. I am concerned that the proposed "early actions" are not sufficiently strong to make the difference we need.

Californians support bold action to combat global warming pollution. The whole world is watching the Air Board to see whether it is willing to take enforceable steps now to implement California 's historic global warming law.

I urge the Board, specifically, to adopt early action measures to:

1. Reduce diesel emissions from heavy-duty trucks;
2. Require ports to provide shore-side electrification to vessels;
3. Require cement factories to use energy more efficiently.

These measures will both reduce greenhouse gas emissions and protect public health by reducing toxic air pollution.

Sincerely,  
Stephanie Reyes  
concerned citizen

Subject: Global Warming Solutions Act of 2006

Comment:

California has yet another opportunity to lead the world and attract talent and industry to the state to solve problems. In addition to measures being adopted, please also add measures to:

1. Reduce diesel emissions from heavy-duty trucks;
2. Require ports to provide shore-side electrification to vessels;
3. Require cement factories to use energy more efficiently.

These measures will both reduce greenhouse gas emissions and protect public health by reducing toxic air pollution. By leading the way with these measures we encourage the creation of California-based companies to solve these problems. These problems will have to be solved globally, so it is best to lead the curve rather than follow it. This leads to higher tax revenue, etc.

Subject: CARB Air Emissions  
Comment:

Dear Chairman Sawyer & Members of the California Air Resources Board,

We need to implement the strictest emissions standards to ensure the health and well-being of our communities. Without the CARB commitment to this end, any measures passed or voted on are meaningless for the better good. Without holding businesses and industry to the highest standards we are holding ourselves hostage to poor air quality and illnesses as consequences.

We need to:

- Reduce diesel emissions from heavy-duty trucks;
- Require ports to provide shore-side electrification to vessels;
- Require cement factories to use energy more efficiently.
- Provide Firm Deadlines and Commitments for Measures Contained in Tables 2 & 3

Thank you, Joan Davidson
