Subject: CA Diesel Emissions Legislation

Comment:

I do not wish the government or the ARB to pass further regulations on Diesel or Gasoline engines, both on-road and off-road.

It makes no sense that a 1 ton truck used to get 20+ mpg without all the extra emissions controls, now the same truck gets 12-16mpg.

Has there honestly been a 40% reduction in emissions to justify the wanton waste of fuel? I do not want my tax dollars spent monitoring private individuals or businesses. I do not want or see the need for more emissions products to be forced to be installed on/in vehicles for private individuals, businesses or manufacturers by our government. It is hurting our economy.

Furthermore, i disapprove of the so-called "diesel expert" you as the state decided to hire.

and check out the story concerning one of the Ca ARB experts:...

He was one of the "experts" leading the study. Bought his "PhD" online for \$1000 ... With that fraud he is still employed by the state at \$8,000 a month.
