Calais, DeVille, Fleetwood, Fleetwood Sedan, Fleetwood Limousine, Eldorado.

Engine Family 601 with "CCS/EGR"

Engine Size - 115.8 cubic inches

Models:

Opel 1900, Opel GT.

EXECUTIVE ORDER A-6-1

Section 39152, Part I, Division 26 of the California Health and Safety Code requires that a decal be affixed to the side window which discloses the highest emissions from the certification fleet for that engine family for which approval has been granted by the Board.

The following are recommended values to be listed on the decal:

<u>Engine Family</u>	<u>Hydrocarbons gms/mi</u>	<u>Carbon Monoxide gms/mi</u>	<u>Nitrogen Oxides gms/mi</u>
101	2.1	24	2.1
102	2.4	38	2.8
104	2.7	30	2.5
105	2.7	23	2.3
202	3.0	30	2.9
302	2.0	30	2.8
402	2.5	29	2.5
501	2.2	26	2.4
601	2.9	34	2.1

These values are in effect until January 30, 1973. After this date, the exhaust emissions for each vehicle determined by factory assembly-line tests in accordance with the "Assembly-Line Test Procedure for 1973 and Subsequent Model Light-Duty Vehicles" must be shown on a decal.

Section 3 of the above procedure requires you to submit, before the start of a model-year, a list of the items to be functionally checked and the procedure, including instrumentation, for performing these checks.

In accordance with Section III E. of the California Exhaust Emission Standards and Test Procedures for 1973 through 1976 Models Gasoline-Powered Light-Duty Motor Vehicles, you are required to inform the ARB of any production changes which will affect emissions.

Supplemental information sheets are attached to this order which include tune-up specifications and emission control system data.

The Department of Motor Vehicles, the California Highway Patrol, and the Bureau of Automotive Repair of the Department of Consumer Affairs will be notified of this approval by copy of this order and attachment.

Executed at Sacramento, California, this 21st day of August, 1972.

JOHN A. MAGA
Executive Officer
