

Form Letter 1 for Comment 87 for ZEV 2008 (zev2008) - 45 Day.

First Name: David
Last Name: Alcantaro
Email Address: loaddown@mail.com
Affiliation:

Subject: CARB ZEV2008 Amendment
Comment:

On March 27, the California Air Resources Board will revise the history-making program that put more than 5,000 Zero Emission Vehicles (ZEVs) on the road.

But their staff has issued a proposal that, instead of propelling our country ahead toward a pollution-free future, will profoundly weaken the program once again. This proposal would require automakers to produce only about 150 ZEVs each per year through 2015—which amounts to less than what these influential regulators mandated in 2003.

Please adopt a stronger proposal that puts more ZEVs on the roads, and helps move California toward the future. This is the will of the people that love our home - planet earth.

Sincerely,

David Alcantaro

Comment:

As you know, on March 27, CARB may revise the history-making program that put more than 5,000 Zero Emission Vehicles (ZEVs) on the road.

But your staff has issued a proposal that, instead of propelling our country ahead toward a pollution-free future, will profoundly weaken the program once again. This proposal would require automakers to produce only about 150 ZEVs each per year through 2015—which amounts to less than what these influential regulators mandated in 2003.

Please urge the Governor to ask the board for a stronger proposal that puts more ZEVs on the roads, and helps move California toward the future.

Comment:

We own a Prius because it is the best technology currently available to the masses but the EV1, available a full decade ago, was an even better solution. Let's get off oil. It would help our society on so many levels.

On March 27, the California Air Resources Board will revise the history-making program that put more than 5,000 Zero Emission Vehicles (ZEVs) on the road.

But their staff has issued a proposal that, instead of propelling our country ahead toward a pollution-free future, will profoundly weaken the program once again. Take the auto-company's hands out of your back pocket! Or is that the oil company's hands in there also? What is wrong with you people? I know you're politicians, BUT TRY using your brain once in a while!

Subject: Please increase ZEV quota!
Comment:

Dear CARB:

I have heard the following:

"On March 27, the California Air Resources Board will revise the history-making program that put more than 5,000 Zero Emission Vehicles (ZEVs) on the road.

"But their staff has issued a proposal that, instead of propelling our country ahead toward a pollution-free future, will profoundly weaken the program once again. This proposal would require automakers to produce only about 150 ZEVs each per year through 2015â€"which amounts to less than what these influential regulators mandated in 2003.

"Please urge the Governor to ask the board for a stronger proposal that puts more ZEVs on the roads, and helps move California toward the future."

So I urge you directly to propose more ZEVs for our roads!

Sincerely, Peter Dillon

Subject: Zero Emission
Comment:

Dear CARB,

I write today to ask that the California Air Resources Board not weaken the current Zero Emission Vehicle regulations. Zero emission vehicles not only reduce air pollution, but help in the fight against global warming. In fact, now is the time to strengthen, not weaken, these requirements.

As a potential car purchaser, I am concerned about pollution as well as the high price of gasoline. I would very much like to have the option of purchasing a zero emission vehicle and reducing my own impact in these areas. This is unlikely to come to pass, though, if automakers are only required to make 150 ZEV vehicles per year.

Finally, I fully support the staff's proposal to significantly increase the number of plug-in hybrids that must be produced and appreciate staff's vision in including these cars in the ZEV requirements. A plug-in hybrid that has an all-electric range, but that also runs on gasoline when the battery is empty, is a great option for consumers like me.

Sincerely,
M. Cecilia Gomez
