Subject: Stop funding biogas

Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),

As a California resident, I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and the planet.

Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation

and growth of the notoriously harmful factory farming industry.

Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis.

And it increases rates of high blood pressure, respiratory conditions, and waterborne illnesses for local communities. To begin addressing these substantial harms, I implore you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

The future of our communities and shared environment is in your hands. Please reform LCFS to create a safer, healthier home for all Californians. Thank you for your time and consideration.

Subject: PLEASE DO NOT FUND BIOGAS  
Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),

As a born and raised Californian, I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and our planet.

Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation and growth of the notoriously harmful factory farming industry.

Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis. And it increases rates of high blood pressure, respiratory conditions, and waterborne illnesses for our communities. To start addressing these substantial harms, I strongly urge you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

The future of our communities, our health, and shared environment is in your hands. Please reform LCFS to create a safer, healthier home for all Californians.

Thank you,  
Mary Fryer MPA, MSW

Subject: Stop Funding Biogas  
Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),

As a California resident, I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and the planet.

Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation and growth of the notoriously harmful factory farming industry. Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis. And it increases rates of high blood pressure, respiratory conditions, and waterborne illnesses for local communities.

To begin addressing these substantial harms, I implore you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
  2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
  3. Remove the 10-year "grace period" for factory farm gas producers.
  4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.
- The future of our communities and shared environment is in your hands. Please reform LCFS to create a safer, healthier home for all Californians.  
Thank you for your time.

Subject: Biogas is unsustainable, increases pollution

Comment:

As a California resident, I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and the planet. I have seen the increase in pollution through the expansion of factory farms in the central valley.

Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation and growth of the notoriously harmful factory farming industry. Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis. 4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

It is crucial that our leadership in this state ends the current Low Carbon Fuel Standard (LCFS) policies that reward factory farm polluters using my taxes. Show you care about our climate and the citizens of the central valley, and the rest of the state.

Thank you.

Subject: Stop Funding Biogas  
Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),

I'm writing to express my concerns about the allocation of taxpayer funds for factory farm biogas projects.

Funding biogas production under the Low Carbon Fuel Standard (LCFS) seems to give the green light to the factory farming industry, which has its share of problems. Every year, billions of animals suffer in terrible conditions due to it, not to mention the pollution it causes - air, water, and methane - all exacerbating the climate crisis and impacting the health of local communities.

I have a few suggestions for addressing this:

1. Eliminate "avoided methane crediting" by 2024.
2. Correct the Life Cycle Assessments to accurately account for all greenhouse gas emissions from factory farm biogas.
3. Remove the 10-year "grace period" for factory farm biogas producers.
4. Cease double counting - if they're already receiving funding from other programs, they shouldn't be eligible for LCFS credits.

I understand the complexities you face, but the decisions made now will greatly impact our communities and environment. Let's work together to ensure California becomes a safer, healthier place for all.

Thank you for your attention to this matter.

Sincerely,  
Jeannine Farrelly

Subject: biogas IS NOT A VIABLE SOLUTION

Comment:

Funding biogas production under the Low Carbon Fuel Standard (LCFS) is harmful and incentivizes the consolidation and growth of the factory farming industry. Every year, this industry forces billions of animals to suffer in horrendous and cruel conditions. It creates pollution that uses fossil fuel and accelerates the climate crisis. I would choose my taxpaying dollars to fund sustainable and clean energy and I would never support the business of factory farming. To begin addressing substantial harms, I implore you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-yr grace period for factory farming gas production
4. Stop double counting by allowing factory farming gas projects that have been paid for to also be claimed by other programs. This is underhanded and wrong.

Subject: Stop Funding Biogas

Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),

As a California resident, I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and the planet. Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation and growth of the notoriously harmful factory farming industry. Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis. And it increases rates of high blood pressure, respiratory conditions, and waterborne illnesses for local communities. To begin addressing these substantial harms, I implore you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

The future of our communities and shared environment is in your hands. Please reform LCFS to create a safer, healthier home for all Californians.

Thank you for your time and consideration.  
Elizabeth Godfrey

Subject: LCFS is a deeply flawed program in need of profound change.

Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),

I am writing to you personally to express deep concern about the current state of California's Low Carbon Fuel Standard (LCFS) and to implore you to take immediate action to address the environmental injustices embedded in the program.

Originally intended as a tool to combat climate pollution in the transportation sector, the LCFS has been manipulated by powerful corporations, particularly Big Ag and Big Oil. It has become the nation's largest and most lucrative pollution trading scheme for factory farm biogas, perpetuating harmful practices rather than serving its environmental objectives. It is driving the construction of more factory farms and factory farm biogas projects in states far from California, causing severe harm to air, water, public health, rural economies, and overall quality of life.

The current flaws in the LCFS, such as "avoided methane crediting" and inaccurate life cycle assessments, not only enable pollution but disproportionately harm low-income communities and communities of color. Factory farms, predominantly situated in these marginalized areas, inflict severe damage on air, water, public health, rural economies, and overall quality of life.

I urge you to consider and prioritize the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

CARB holds a pivotal opportunity this year to adopt new rules that align the LCFS with California's environmental justice commitments. Environmental justice, zero emission, and climate advocates have presented a clear alternative to the current policies that heap lavish rewards on the biggest polluters through the Comprehensive EJ Scenario. CARB should adopt those recommendations to stop moving California climate policy in the wrong direction.

I implore you to lead the charge in demanding a future free from the clutches of Big Oil and Big Ag. By prioritizing the well-being of Californians over corporate profits, we can reform the LCFS to protect communities most affected by its current flaws. Your decisive action in this critical matter would demonstrate a commitment to bold climate action rooted in justice. Please stop exporting your bad policy to our front doors.

California is greenwashing factory farming.

California has more industrial dairies than any other state, polluting our rivers, depleting our groundwater, and emitting disastrous greenhouse gasses. Now, factory farm polluters claim they are environmentally friendly because they produce "biogas." Even worse, they are using our tax dollars to fund this harmful greenwashing.

California regulators stop investing in factory farm gas!

Biogas is unsustainable and unnecessary--it does not reduce the dairy industry's environmental footprint. In fact, investing in biogas helps maintain and expand factory farms. Investing in biogas means investing in even more factory farm pollution.

This year, the California Air Resources Board (CARB) has the opportunity to adopt new rules that would stop rewarding factory farms for their pollution.

Subject: Stop Funding Factory Farm Biogas Projects  
Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),

As a California resident, I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and the planet. Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation and growth of the notoriously harmful factory farming industry.

Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis. And it increases rates of high blood pressure, respiratory conditions, and waterborne illnesses for local communities.

To begin addressing these substantial harms, I implore you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

The future of our communities and shared environment is in your hands.

Please reform LCFS to create a safer, healthier home for all Californians.

Thank you for your time and consideration

Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),  
As a California resident, I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and the planet.  
Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation and growth of the notoriously harmful factory farming industry. Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis. And it increases rates of high blood pressure, respiratory conditions, and waterborne illnesses for local communities. To begin addressing these substantial harms, I implore you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

The future of our communities and shared environment is in your hands. Please reform LCFS to create a safer, healthier home for all Californians.  
Thank you for your time and consideration.  
Kayhan Soltanpour

Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation

and growth of the notoriously harmful factory farming industry.

Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis.

And it increases rates of high blood pressure, respiratory conditions, and waterborne illnesses for local communities. To begin addressing these substantial harms, I implore you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

The future of our communities and shared environment is in your hands. Please reform LCFS to create a safer, healthier home for all Californians.

Thank you for your time and consideration.

Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),

I'm a professor of medical anthropology and a California resident. I have called the San Francisco Bay Area my home since 2009. I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and the planet.

Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation and growth of the notoriously harmful factory farming industry.

Every year, industrial agriculture forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis. The externalities of industrial agriculture also include health effects: increased rates of high blood pressure, respiratory conditions, and waterborne illnesses for local communities.

To begin addressing these substantial harms, I urge you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up- and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double-counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

The future of our communities and shared environment is in your hands. Please reform LCFS to create a safer, healthier state for all Californians.

Thank you for your time and consideration.

Martha Lincoln, Ph.D.  
Associate Professor  
Anthropology  
San Francisco State University

Subject: Please reform LCSF  
Comment:

Dear Governor Newsom and Members of the California Air Resources Board (CARB),  
As a California resident, I am writing to urge you to stop using taxpayer dollars to fund factory farm biogas projects, which threaten the well-being of animals, people, and the planet.  
Funding biogas production under the Low Carbon Fuel Standard (LCFS) incentivizes the consolidation and growth of the notoriously harmful factory farming industry. Every year, this industry forces billions of animals to suffer in unimaginably cruel conditions. It generates air, water, and methane pollution that entrench fossil fuel interests and accelerate the climate crisis. And it increases rates of high blood pressure, respiratory conditions, and waterborne illnesses for local communities. To begin addressing these substantial harms, I implore you to implement the following reforms to the LCFS:

1. Eliminate "avoided methane crediting" in 2024.
2. Address inaccuracies in the Life Cycle Assessment that ignore associated up and downstream greenhouse gas emissions from factory farm gas production.
3. Remove the 10-year "grace period" for factory farm gas producers.
4. Stop double counting by allowing factory farm gas projects paid for and claimed by other programs to sell LCFS credits as well.

The future of our communities and shared environment is in your hands. Please reform LCFS to create a safer, healthier home for all Californians.  
Thank you for your time and consideration.
