Subject: Please Clean Up Construction Equipment Now
Comment:

Dear Governor and CARB Board Members,

As a resident of California who is concerned about air quality, I strongly encourage you to support a strong regulation to reduce pollution from construction equipment and vote in favor of the regulation at the May 25th CARB hearing.

Pollution from construction equipment burdens all of us, not only through diminished quality of life but also through health costs and lost school and work days. Implementing the proposed measure to reduce pollution from construction and other off-road equipment will prevent an estimated 4,000 premature deaths by 2030 and save billions of dollars in health costs and lost productivity.

We cannot afford to wait any longer to tackle the public health threat from construction and other off-road equipment. I urge you to adopt strong clean construction standards without further delay.

Thank you for your consideration of my comments.

Sincerely,
Christopher Lish
