Dear CARB,

Specific carbon market designs can address objections raised by groups critical of the impacts of AB 32's Cap & Trade program. Instead of giveaways to polluting industries, CARB could auction 100% of permits. Rather than unlimited offsets, CARB can strictly limit them. Inequities in the use of allowance value can be addressed with a Cap & Dividend approach that returns revenues back to all Californians equally. Please incorporate these elements into the environmental analysis.

Sincerely,
Thora Lares
