Comment:

BRING BACK THE ZERO-EMISSIONS REQUIREMENT FOR ELECTRIC CARS.
WE WANT ONE N-O-W. WE DON'T WANT TO WAIT FOR THE SUPPOSED FUEL
CELL MODELS. The environment can't wait, either.

IT IS SINFUL THAT YOU ALLOWED THE AUTO/OIL COMPANIES TO WIN IN
2001. WHAT'S WRONG WITH TRYING EVERYTHING???

This article pretty much says it all:

Subject: reducing GHG's

Comment:

I am glad this bill has passed. The Debate is over. I had a thought of something that might alter or amend this bill later though. What if our next President passed a federal bill to reduce GHG's by 50%? How would the state of CA reduce GHG's more than the 25% mark. I have a suggestion to not just be satisfied with finding ways to reduce just enough for 25%, but go further with the implementation part of it. The goal is only a 25% reduction, but leave other options open as well and implement them so when the next bill comes it won't cost CA as much money.

-Just wondering how this new bill potential federal bill would change things...

-And, if you are only looking for enough options to reduce the GHG's 25%, if you had more ideas of reduction in mind that were not approved by the ARB would it reduce them more and be better to just implement them anyway?

-Finally, how are you sure that the reduction will be 25%? Maybe we should shoot for 35% and only hit 25%...

Comment 10 for 1990 GHG Emissions Level (ccei07) - Non-Reg.

First Name: Norman

Last Name: Pedersen

Email Address: npedersen@hanmor.com

Affiliation: Southern California Public Power Author

Subject: Agenda Item 07-12-4, 1990 Statewide Greenhouse Gas Emissions Level

Comment:

The Southern California Public Power Authority ("SCPPA") compliments the Staff on its effort to identify the 1990 total statewide aggregated emissions level. However, SCPPA urges the Board to permit further adjustment of the 1990 total.

SCPPA is particularly concerned that the 1990 total that is presented for Board adoption may be understated due to an understatement of the 1990 emissions associated with imported electricity. According to the Staff Report, electricity generation emissions account for 26 percent, 110.6 MMTCO₂e, of the total 1990 emissions of 427 MMTCO₂e. Approximately a third of the electricity generation emissions, 31 MMTCO₂e, is associated with "unspecified imports" for which the generating plant is unknown. That figure may be low by as much as 10-20 MMTCO₂e.

The figure for emissions associated with unspecified electricity imports is based on region-specific emission factor assumptions for the Pacific Northwest and the Pacific Southwest. The Staff relied on certain CEC assumptions. SCPPA is concerned that those assumptions may not accurately reflect the actual dispatch of electricity from, particularly, the Pacific Northwest.

SCPPA urges the Board to permit the 1990 figure for electricity generation to continue to be refined both by specifically identifying imports that have been heretofore classified as "unspecified" and by further examining the assumptions that the Staff adopted from the CEC.

Thank you for this opportunity to express SCPPA's concerns.
