Comment:

To Whom It May Concern:

Is anyone paying attention to the pollution by the use of gas blowers? Every day I witness gardeners blowing dust and debris into the streets or onto the property of the next-door neighbor. What I don't see, however, but I do smell and breathe in, is all the contamination that the gas blowers create. This is very concerning to me. Gas blowers create more pollution than cars. They also make a lot more noise than most cars. Gas blowers affect everyone's health: the smog is bad for our lungs and the noise is bad for our ears and for our nervous system. The noise creates an agitated and unnerving environment. What happened to the use of brooms and rakes? Do we really have to have every single leaf off of our property? In fact, leaves create the mulch that we are supposed to have in our yards to make the soil more rich and more sustainable.

What can we do to discourage the use of gas blowers and stop polluting?

Thank you.

Alice Leon
