Subject: Flying insects and "other flying arthropods"

Comment:

ARB should remove the term "or other flying arthropods" from the consumer products regulation for the definition of "flying bug insecticide. Insects are the only known flying arthropods; there are no flying arthropods that are NOT insects. The definition already includes the term "flying insects" and this, therefore, includes ALL flying arthropods. Including the term "or other flying arthropods" implies that there are flying arthropods that are not insects (e.g., crabs, spiders, or centipedes with wings?). However, this is simply not the case, as can be confirmed through consultation with any college level textbook on animal form and function or animal taxonomy. Continuing to include the phrase "or other flying arthropods" is simply incorrect and only leads to confusion over the applicability of this category of products to other arthropods that are not insects and do not fly.

Comment:

September 23, 2013

Clerk of the Board
California Air Resources Board
1001 I Street
Sacramento, CA 95912
via web portal - <http://www.arb.ca.gov/lispub/comm/bclist.php>

Subject: Proposed Amendments to the Consumer Products Regulations

Dear Clerk of the Board,

Ecolab appreciates the opportunity to comment on the amendments to the Consumer Products regulation. These amendments are to be heard by the California Air Resources Board on September 26, 2013.

A trusted partner at more than one million customer locations, Ecolab (ECL) is a global leader in water, hygiene and energy technologies and services that protect people and vital resources. With 41,000 associates, Ecolab delivers comprehensive solutions and on-site service to help ensure safe food, maintain clean environments, optimize water and energy use and improve operational efficiencies for customers in the food, healthcare, energy, hospitality and industrial markets in more than 170 countries around the world.

Ecolab has the following comments.

- Ecolab supports the addition of the definitions for Single Purpose Cleaner and Single Purpose Degreaser. Ecolab produces General Purpose products and Single purpose products. The addition of the definitions provides clarity to the regulation.
- Ecolab supports the scientific pathway being taken by the staff in dealing with the Low Vapor Pressure (LVP) provision. LVP compounds are extremely important in maintaining compliance with current and future VOC limits. The LVP provision is needed to provide technical feasibility to the current VOC limits. In summary, Ecolab supports the amendments to the Consumer Product regulation.

Thank you for your consideration to these comments. Any questions or comments feel free to call our consultant Doug Raymond at 440-474-4999 or at djraymond@reg-resources.com.

Sincerely,

Sara Seidl

Mary Nichols, Chair
California Air Resources Board
1001 I Street
Sacramento, CA 95912
Via web portal - <http://www.arb.ca.gov/lispub/comm/bclist.php>

RE: Proposed Amendments to the Aerosol Coating Products and the
Consumer Products Regulations

Dear Chair Nichols:

Ball Metal Food & Household Products appreciates the opportunity to comment on the Proposed Amendments to the Aerosol Coating Products and the Consumer Products Regulations scheduled for consideration by the California Air Resources Board on September 26. Ball supports specific comments submitted by the American Coatings Association and the Consumer Specialty Products Association on the Proposed Amendments.

The consumer products industry has been actively engaged with the California Air Resources Board since the promulgation of the Consumer Products Regulation in the late 1980s. Product formulators expend countless hours and considerable amount of research and development resources to reformulate products that meet consumers' needs and comply with the ARB's stringent regulatory standards. We have worked collectively to achieve the specific VOC limits by category to address air quality standards and have invested hundreds of millions of dollars in research and development to achieve these results.

Ball Metal Food & Household Products appreciates the opportunity for stakeholder input as the proposed regulation was developed. The Planning and Technical Support Division staff conducted several public workshops and considered the technical input of stakeholders in revising the proposed amendments to help ensure the final draft achieved the required emissions reductions and does not compromise the statutory requirements to ensure that proposals must be technically and commercially feasible and does not eliminate any product form.

While the proposed regulatory provisions are technically challenging for the industry to meet, we believe that the proposed amendments are a reasonable approach to meeting the required emissions reductions and we commit to expend the necessary time and

effort to meet these new regulatory standards.

Sincerely,

John J. Blum, Ph.D.

Subject: 15-Day Notice of Modifications to the Original Proposed 2013 Amendments to the California

Comment:

The National Aerosol Association (NAA) appreciates the opportunity to comment on the California Air Resources Board's (ARB's) 15-day Notice of Public Availability of Modified Text for the September 2013 Public Hearing Amendments to the Consumer Product Regulation.
