Comment:

The proposed allocations (under AB398) to climate polluters are too large in many instances to be effective. In some cases the allocations would actually allow more emissions than the polluters are currently emitting.

As a society we have waited too long to take the appropriate actions. As the recent IPCC report states we must begin immediately to cut emissions wherever possible. These allocations are not going to achieve this objective.

So I plead with you for my pre-school grandchildren to do the right thing.--

Fight for Renewable Energies! Save the global ecology; create jobs; eliminate dependence on foreign oil; reduce military requirements
