Subject: LCFS Pricing
Comment:

What is CARB doing to help increase LCFS pricing to move our green initiatives forward? Something needs to be done QUICKLY to help drive demand/increase prices for LCFS credits to drive company investments into more green energy.

Subject: SB 253 and SB 261

Comment:

We would urge the board to creatively source funding necessary to begin the process immediately of drafting regulations as required by SB 253 and 261, which are landmark laws that are critical in the global effort to standardize and improve climate risk and GHG emissions disclosures. The implementation timeline is tight, and it is imperative that the Board begin this work immediately in order to draft suitable regulations as necessitated by the laws.
