Comment:

ARROW TRANSIT MIX, INC.

Clerk of the board, Air resources Board
1001 I Street
Sacramento, California 95814

RE: Proposition 1B: Goods Movement Emission Reduction Program
Guidelines updates.

Dear board members,

Arrow Transit Mix is a family owned and operated ready mix business in the Antelope Valley California that employs 28 employees. We have reviewed all information regarding the Proposition 1B program. It seems here in the Antelope Valley we are excluded from the Los Angeles / Inland Empire Trade Corridor. This unfortunately puts us in unfair competition with our direct competitors who are able to receive these incentives. It has also been brought to our attention that certain counties who have better air quality data then the Antelope Valley have been granted incentives (I.E. Napa county, Kings county, Marin county). As you can imagine we have been frustrated trying to comply and continue to run a successful business that so many hard working men and women in our community rely on to support their families.

Attached are some documents for your review.

Thank you for your time and consideration.

Subject: Switcher locomotives

Comment:

Thank you for the opportunity to comment on the updates to this important program.

Regarding the change to "[m]odify the requirement for switcher locomotives to operate 90 to 100 percent of their time in the four trade corridors to 50 percent," I request that ARB provide documentation or citations showing that this proposed change is "consistent with the requirement for the other mobile source categories." Additionally, unless there are compelling reasons for the 50 percent requirement, I suggest that ARB consider modifying this requirement to an intermediate level of 75 percent. This change would ensure that funding is directed toward those switcher locomotives that spend the most time within the four trade corridors.
