Subject: Scoping Plan
Comment:

<p>California needs to scale up investment in zero-emission and mass transportation options that work for our communities. Clean cars, clean trucks and transit must be accessible and affordable to working-class Californians. I urge CARB to:</p>
<p>. Roll out a full, coordinated phase out of fossil fuels, with targets for oil refining by 2045, oil and gas extraction by 2035, and a clean electric grid by 2035.</p>
<p>. Accelerate and scale up investments in clean cars, trucks, and mass transit for working class Californians across the state.</p>
<p>. Eliminate reliance on climate policy dead ends like Carbon Capture, Utilization, and Storage (CCUS) on polluting fuel sources.</p>

Subject: Support a clean electric grid by 2035
Comment:

Please create a future that moves us beyond oil and gas in California! I implore CARB to support these steps:

- Roll out a full, coordinated phase out of fossil fuels**, with targets for oil refining by 2045, oil and gas extraction by 2035, and a clean electric grid by 2035.
- Accelerate and scale up investments in clean cars, trucks, and mass transit** for working class Californians across the state.
- Eliminate reliance on climate policy dead ends** like Carbon Capture, Utilization, and Storage (CCUS) on polluting fuel sources.

Thank you.
