Good afternoon,

I have a question regarding the Advanced Clean Fleet Regulation by 2035. We currently don't work in the rail or ports systems, we are an OTR interstate freight transportation company. I was wondering how these new requirements will affect us in the future. As no current electric vehicle has the battery power to go on out of state trips. Can you please provide more information on this matter? We currently have no plans to work in the rail or port systems, but need more clarity as far how this requirements will affect companies that don't work in the rail or port systems.

Regards

Geovanni Perez
