

(B) 100 tpy of carbon monoxide. At the discretion of the local air district, the 100 tpy threshold for applicability can be based on the facility's authorized (permitted) potential to emit, instead of actual data year emissions.

Brings in some named sectors as specified in Table A-3 later in this document. Some are identified by NAICS code and some by name.

(C) Activity levels or emissions levels published in Appendix A, Table A-3 for a permitted emissions process at a facility classified with a matching primary or secondary Standard Industrial Classification (SIC) code or North American Industry Classification System (NAICS) code listed for the permitted emissions process. If the SIC or NAICS codes have a designation of "Any" in Table A-3 for a permitted process, then reporting for the process is required regardless of the SIC or NAICS designation for the facility performing the process, if the listed activity level reporting threshold is exceeded.

Exclusions.

(1) For facilities identified in section 93401(a)(1), this article does not apply to, and emissions reporting is not required for, the following facilities or entities that are subject to reporting their greenhouse gas emissions pursuant to CCR, title 17, section 95101:

- (A) Suppliers of transportation fuels (CCR, title 17, section 95121), suppliers of natural gas, natural gas liquids, and liquefied petroleum gas (CCR, title 17, section 95122), and suppliers of carbon dioxide (CCR, title 17, section 95123), that do not report any facility combustion emissions under the requirements of CCR, title 17, sections 95100 through 95158.
- (B) Electric power entities as defined in CCR, title 17, section 95102.
- (C) Natural gas distribution facilities.

Agriculture exclusions. Both of these can be significant sources. Note that burning is excluded EVEN IF permitted.

(2) This article does not apply to, and emissions reporting is not required for the sources specified in subsections (A), (B), and (C) below. Any emissions associated with the specified sources are excluded from facility applicability determinations.

~~(A)(2) This article does not apply to, and emissions reporting is not required for, Emissions from the combustion of diesel fuel or other fuels in internal combustion engines that are used for irrigation pumps (including booster pumps and groundwater well pumps) at agricultural operations.~~

~~(B)(3) This article does not apply to, and emissions reporting is not required for, Emissions from open burning of fields, or open burning of agricultural wastes or agricultural residues that is subject to burn permitting by a local air district.~~

~~(C)(4) This article does not apply to, and emissions reporting is not required for, Emissions from tactical support equipment (TSE).~~
