**RE: Perc Regs**

We are strongly against the proposed changes to the CATC measures.

- #1. The information is inconclusive
- #2. We've seen no concrete research data proving a direct link of perc and cancer (spoken by a third generation dry cleaner – 56 years)
- #3. Perc is the best option to date
- ##4. Alternatives and regulation implementations are cost prohibitive for the majority of dry cleaners, which are largely mom and pop plants
- #5. Two of the three options are unproven and unsafe
