

State of California
AIR RESOURCES BOARD

EXECUTIVE ORDER D-14-5-A
Relating to Exemptions under Section 27156
of the Vehicle Code

ENERGY PRODUCTS, INC.
"V. C. METER"

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39023 of the Health and Safety Code;

IT IS ORDERED AND RESOLVED: That the installation of the "V. C. Meter" manufactured by Energy Products, Inc. of 4340 Redwood Highway, San Rafael, California 94903 has been found to not reduce the effectiveness of required motor vehicle pollution control devices and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for 1972 through 1975 model-year vehicles with engines greater than 140 CID.

The device consists of a relief valve with a filter and can be identified by "V. C. Meter" stamped at the bottom of the housing. The valve is inserted between the PCV valve and the intake manifold and permits a small amount of additional air to enter the PCV line.

This Executive Order is valid provided that installation instructions for this device will not recommend tuning the vehicle to specifications different than those listed by the vehicle manufacturer.

Changes made to the design or operating conditions of the device, as exempted by the Air Resources Board, that adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

Marketing of this device using an identification other than that shown in this Executive Order or marketing of this device for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board.

This Executive Order does not constitute any opinion as to the effect that the use of this device may have on any warranty either expressed or implied by the vehicle manufacturer.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF THE "V. C. METER" DEVICE.

No claim of any kind, such as "Approved by Air Resources Board" may be made with respect to the action taken herein in any advertising or other oral or written communication.

Section 17500 of the Business and Professions Code makes unlawful, untrue or misleading advertising, and Section 17534 makes violation punishable as a misdemeanor.

Sections 39130 and 39184 of the Health and Safety Code provide as follows:

"39130. No person shall install, sell, offer for sale, or advertise, or, except in an application to the board for certification of a device, represent, any device as a motor vehicle pollution control device unless that device has been certified by the board. No person shall sell, offer for sale, advertise, or represent any motor vehicle pollution control device as a certified device which, in fact, is not a certified device. Any violation of this section is a misdemeanor."

"39184. (a) No person shall install, sell, offer for sale, or advertise, or, except in an application to the board for accreditation of a device, represent, any device as a motor vehicle pollution control device for use on any used motor vehicle unless that device has been accredited by the board. No person shall sell, offer for sale, advertise, or represent any motor vehicle pollution control device as an accredited device which, in fact, is not an accredited device. Any violation of this subdivision is a misdemeanor."

Any apparent violation of the conditions of this Executive Order will be submitted to the Attorney General of California for such action as he deems advisable.

Executive Order D-14-5, dated March 19, 1975, is superseded and of no further force and effect.

Executed at Sacramento, California, this 28th day of April, 1975.

WILLIAM SIMMONS
Executive Officer

State of California

AIR RESOURCES BOARD

April 15, 1975

Staff Report

Evaluation of Energy Products, Inc.
"V. C. Meter" Air Bleed Valve for
Compliance with the Requirements of
Section 27156 of the California Motor Vehicle Code

I. Introduction

Energy Products, Inc. of 4340 Redwood Highway, San Rafael, California 94903 had requested permission to market a device called "V. C. Meter" which was manufactured by Albano Enterprises, Inc. of Santa Ana, California and is identical in construction and performance to the "Air Jet" device also manufactured by Albano Enterprises. This permission was granted by Executive Order D-14-5. The "Air Jet" device, as submitted by Albano Enterprises, was evaluated by the Air Resources Board Staff and found to not adversely effect the emission control system. Executive Order D-14-3 was issued to Albano Enterprises granting the exemption for the "Air Jet" device for 1972-1974 model-year vehicles with engines greater than 140 cubic inch displacement.

II. Device Description

For a description of the construction and operation of the "V. C. Meter", see the report on the Staff's evaluation of the "Air Jet" device dated March 27, 1974.

April 15, 1975

The "V. C. Meter" trade name is permanently stamped on the device at the bottom of the housing.

III. Conclusions and Recommendation

The Staff has evaluated the "Air Jet" device and found that it has no significant effects on exhaust emissions. It is the opinion of the Staff that the "V. C. Meter" device being identical in construction and performance would also produce the same effect.

Energy Products, Inc., in a letter dated April 7, 1975, stated that it now manufactures the V. C. Meter itself and requests that the name of Albano Enterprises be deleted from Executive Order D-14-5.

The Staff recommends that Executive Order D-14-5-A, showing the new manufacturer, be adopted and Executive Order D-14-5 be rescinded.

Attn: Mr. Richard Kenny

Dear Mr. Kenny:

We ENERGY PRODUCTS, INC., have authorized "Hollywood Accessories" 19914 South Via Barron, Compton, California 90020, to exclusively distribute the V.C. METER Nationally.

I understand that they have applied for such ¹saction from your board and need the approval from the parent company Energy Products, Inc., to the Air Resources Board. They have indeed received our approval for just such distribution from our office.

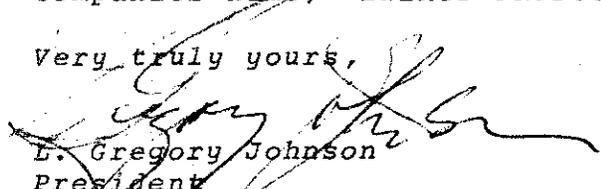

Since Mr. Kaffen has already spoken to about this company, I pray there will be no difficulty from the Board.

It has been noted, that the Exemption for the 1975 automobiles indicated that the Meter was being manufactured by the same Albano Interprises and distributed by Energy Products, Inc. This I believe was an oversight on your behalf for the reasons, that Mr. Kaffen mentioned. We are the manufacture of the Meter and plan to continue same.

The last trip as you might recall, we brought in some samples of our manufactured V.C. METER made by us here in the Bay Area. This sampling was for the purpose of your evaluation and I believe your exemption indicated same.

We would be most pleased, if the name of Albano Interprises was left out of our Exemption and replaced with the parent companies name; "ENERGY PRODUCTS, INC.

Very truly yours,

L. Gregory Johnson
President
Energy Products, Inc.
