

State of California
AIR RESOURCES BOARD

EXECUTIVE ORDER D-165-6
Relating to Exemptions Under Section 27156
of the Vehicle Code

DOWNEY OFF ROAD MANUFACTURING
EFI Air Cleaner Assembly

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-45-9;

IT IS ORDERED AND RESOLVED: That the installation of the EFI Air Cleaner Assembly, manufactured and marketed by Downey Off Road Manufacturing, 10001 S. Pioneer Blvd. P.O. Box 3725, Santa Fe Springs, California 90670-3221 has been found not to reduce the effectiveness of the applicable vehicle pollution control system and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for the following Toyota truck applications:

<u>Part No.</u>	<u>Application</u>
171FI-85	1985-87 pickup & 4 Runner, 4 cyl. engine
171FI-88	1988 pickup & 4 Runner, 4 cyl. engine
171FI-89	1989-95 pickup & 4 Runner, 4 cyl. engine
FI-95	1995-98 pickup & 4 Runner, 4 cyl. engine
171FI-30	1988-95 pickup & 4 Runner, 6 cyl. engine
171FI-34	1995-98 pickup & 4 Runner, 6 cyl. engine
17195-T	1995-98 T-100, 6 cyl. engine
171FI-99	1999-2000 pickup & 4 Runner, 6 cyl. engine
171FI-00	2000 Tundra, 8 cyl. engine

The High Flow Cold Air Intake System includes the following main components: K&N cone shaped open element filter, necessary tubing, and mounting hardware.

This Executive Order is valid provided that the installation instructions for the EFI Air Cleaner Assembly will not recommend tuning the vehicle to specifications different from those of the vehicle manufacturer.

This Executive Order shall not apply to any Downey Off Road Manufacturing EFI Air Cleaner Assembly advertised, offered for sale, sold with, or installed on a motor vehicle prior to or concurrent with transfer to an ultimate purchaser.

Changes made to the design or operating conditions of the EFI Air Cleaner Assembly, as exempt by the Air Resources Board, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

Marketing of the EFI Air Cleaner Assembly using any identification other than that shown in this Executive Order or marketing of the EFI Air Cleaner Assembly for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board.

This Executive Order does not constitute any opinion as to the effect the use of the EFI Air Cleaner Assembly may have on any warranty either expressed or implied by the vehicle manufacturer.

This Executive Order is granted based on an engineering evaluation which determined that the EFI Air Cleaner Assembly will have no adverse impact on evaporative or tailpipe emissions if tested in accordance with the Cold-Start CVS-75 Federal Test Procedure. Furthermore, Downey Off Road Manufacturing demonstrated, using a 1995 Toyota truck, that the EFI Air Cleaner Assembly did not affect the ability of the vehicle's OBD II system to monitor various emission related functions. However, the ARB finds that reasonable grounds exist to believe that use of the EFI Air Cleaner Assembly may adversely affect emissions of motor vehicles when operating under conditions outside the parameters of the previously prescribed test procedures. Accordingly, the ARB reserves the right to conduct additional emission tests, in the future, as such tests are developed, that will more adequately measure emissions from all cycle phases. If such test results demonstrate that the EFI Air Cleaner Assembly adversely affect emissions during off-cycle conditions (defined as those conditions which are beyond the parameters of the Cold-Start CVS-75 Federal Test Procedure), this Executive Order shall be effectively rescinded as of the date the test results are validated. Further, if such test results or other evidence provides the ARB with reason to suspect that the High Flow Cold Air Intake System will affect the durability of the emission control system, Downey Off Road Manufacturing shall be required to submit durability data to show that the durability of the vehicle emission control system is not, in fact, affected and/or that the add-on or modified part demonstrates adequate durability.

In addition to the foregoing, the ARB reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

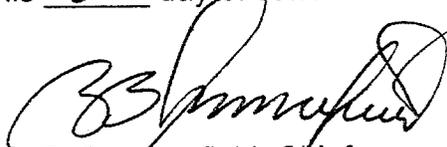

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF DOWNEY OFF ROAD MANUFACTURING'S EFI AIR CLEANER ASSEMBLY.

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination after hearing that grounds for revocation exist.

Executive Order D-165-4, dated January 1997, is superseded and of no further force and effect.

Executed at El Monte, California, this 6th day of June 2000.

R. B. Summerfield, Chief
Mobile Source Operations Division
