State of California
AIR RESOURCES BOARD

EXECUTIVE ORDER D-512-2
Relating to Exemptions Under Section 27156
Of the Vehicle Code

Bully Dog Technologies
Ford Powerstroke Diesel Module

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-02-003;

IT IS ORDERED AND RESOLVED; That the installation of the Ford Powerstroke Diesel Module manufactured and marketed by Bully Dog Technologies, 2854 West 2200 South, Aberdeen, Idaho 83210, has been found not to reduce the effectiveness of the applicable vehicle pollution control system and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for the following diesel truck applications:

<u>Vehicle Make/Model</u>	<u>Model-Year</u>	<u>Engine Type & Size Max.</u>	<u>GVWR</u>
Ford F150 & F250	2002 and older	7.2L Navistar Powerstroke	11,200 lbs.

This Executive Order is valid provided that the installation instructions for the Ford Powerstroke Diesel Module will not recommend tuning the vehicle to specifications different from those submitted by the device manufacturer.

This Executive Order shall not apply to any Bully Dog Technologies Ford Powerstroke Diesel Module advertised, offered for sale, sold with, or installed on a motor vehicle prior to or concurrent with the transfer to an ultimate purchaser.

Changes made to the design or operating conditions of the Ford Powerstroke Diesel Module, as exempt by the Air Resources Board, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

Marketing of the Ford Powerstroke Diesel Module using any identification other than that shown in this Executive Order or marketing of the Ford Powerstroke Diesel Module for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board. Exemption of the system shall not be construed as exemption to sell, offer for sale, or advertise any component of the kit as an individual device.

This Executive Order does not constitute any opinion as to the effect the use of the Ford Powerstroke Diesel Module may have on any warranty either expressed or implied by the vehicle manufacturer.

This Executive Order is granted based on previously submitted emission test data which showed that the Ford Powerstroke Diesel Module will have no adverse impact on exhaust emissions of the tested vehicle (Executive Order D-512). Furthermore, Bully Dog Technologies demonstrated, using a 2000 Ford truck with a 7.3L Navistar diesel engine, that the Ford Powerstroke Diesel Module did not affect the ability of the vehicle's OBDII system to monitor various emission related functions. The same impact on emissions and OBDII system is expected from use of the Ford Powerstroke Diesel Module on vehicles included in this Executive Order.

However, the ARB finds that reasonable grounds exist to believe that the use of the Ford Powerstroke Diesel Module may adversely affect emissions of motor vehicles when operating under conditions outside the parameters of the previously prescribed test procedures. Accordingly, the ARB reserves the right to conduct additional emission tests, in the future, as such tests are developed, that will more adequately measure emissions from all cycle phases. If such test results demonstrate that the Ford Powerstroke Diesel Module adversely affects emissions during off-cycle conditions (defined as those conditions which are beyond the parameters of the Cold-Start CVS-75 Federal Test Procedure), this Executive Order shall be effectively rescinded as of the date the test results are validated. Further, if such test results or other evidence provides the ARB with reason to suspect that the Ford Powerstroke Diesel Module will affect the durability of the emission control system, Bully Dog Technologies shall be required to submit durability data to show that the durability of the vehicle emissions control system is not, in fact, affected and/or that the add-on or modified part demonstrates adequate durability.

In addition to the foregoing, the ARB reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF BULLY DOG TECHNOLOGIES' FORD POWERSTROKE DIESEL MODULE.

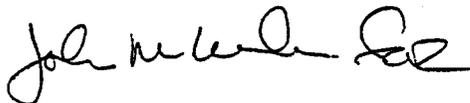

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and

the order may not be revoked until a determination is made, after the hearing, that grounds for revocation exist.

Executive Order D-512, dated January 2001, is superseded and of no further force and effect.

Executed at El Monte, California, this 22nd day of July 2002.

A handwritten signature in black ink, appearing to read "Allen Lyons".

Allen Lyons, Chief
Mobile Source Operations Division
