

State of California
AIR RESOURCES BOARD

EXECUTIVE ORDER D-707-1

Relating to Exemptions Under Section 27156
of the California Vehicle Code

A&A Corvette Performance Ltd.
A&A Corvette Performance Supercharger

Pursuant to the authority vested in the Air Resources Board by Section 27156 of the Vehicle Code; and

Pursuant to the authority vested in the undersigned by Section 39515 and Section 39516 of the Health and Safety Code and Executive Order G-14-012;

IT IS ORDERED AND RESOLVED: That the installation of the A&A Corvette Performance Supercharger, manufactured and marketed by A&A Corvette Performance Ltd., 477 Lambert Street, Unit A, Oxnard, California 93036, has been found not to reduce the effectiveness of the applicable vehicle pollution control systems and, therefore, is exempt from the prohibitions of Section 27156 of the Vehicle Code for the following 2014 to 2016 model year Chevrolet Corvettes not originally equipped with a supercharger:

<u>Model Year</u>	<u>Engine Displacement</u>	<u>Kit Part Number</u>
2014	6.2L w/ Z51 option (dry sump oiling)	AA-14-DS
2014	6.2L w/o Z51 option (wet sump oiling)	AA-14-WS
2015 to 2016	6.2L w/ Z51 option (dry sump oiling)	AA-15-16-DS
2015 to 2016	6.2L w/o Z51 option (wet sump oiling)	AA-15-16-WS

The A&A Corvette Performance Supercharger consists of the following main components: A Vortech V3-Si centrifugal supercharger with a 4.0 inch diameter pulley, a 7.65 inch diameter crankshaft pulley, intercooler, supercharger by-pass valve, new air filter element, air intake tubing, and a new ECU upgrade without user adjustments. These vehicles are not originally equipped with a carbon adsorber pad. The stock radiator thermostat and mass air flow sensor are retained and no changes are made to any part of the fuel system, and original air filter cover is modified. The PCV breather hose may be replaced or modified with an SAE30R9 rated hose or a General Motors replacement equivalent. **Maximum boost is 7 psi.**

This Executive Order is valid provided that the installation instructions for the A&A Corvette Performance Supercharger will not recommend tuning the vehicle to specifications different from those of the kit manufacturer.

Changes made to the design or operating conditions of the A&A Corvette Performance Supercharger, as exempt by the Air Resources Board, which adversely affect the performance of the vehicle's pollution control system shall invalidate this Executive Order.

This Executive Order is granted based on prior submitted emission test data generated on one test vehicle modified with the A&A Corvette Performance Supercharger. Test results showed that emission levels, with the supercharger kit installed, met the applicable emission standards when tested using the Cold-Start CVS-75 Federal Test Procedure (FTP) test cycle and the Supplemental Federal Test Procedure (SFTP US06/SC03) test cycle. Examination of the OBD II system showed that the supercharger kit did not affect OBD II system operation. Results from emissions testing conducted at Quantum Technologies, located at Lake Forest, California, are shown below, in grams per mile, with deterioration factors (df) applied.

2012 model year 6.2L Corvette	CVS-75 FTP			
	NMOG	CO	NOx	HCHO
Standards, Useful Life	0.070	2.1	0.04	0.011
Device Test w/df	0.034	1.0	0.02	0.000
	US06/SC03			
	NMHC+NOx		CO	
Standards 4k	0.14/0.20		8.0/2.7	
Device	0.05/0.01		1.0/0.6	

The Air Resources Board reserves the right in the future to review this Executive Order and the exemption provided herein to assure that the exempted add-on or modified part continues to meet the standards and procedures of Title 13, California Code of Regulations, Section 2222, et seq.

THIS EXECUTIVE ORDER DOES NOT CONSTITUTE A CERTIFICATION, ACCREDITATION, APPROVAL, OR ANY OTHER TYPE OF ENDORSEMENT BY THE AIR RESOURCES BOARD OF ANY CLAIMS OF THE APPLICANT CONCERNING ANTI-POLLUTION BENEFITS OR ANY ALLEGED BENEFITS OF THE A&A CORVETTE PERFORMANCE SUPERCHARGER.

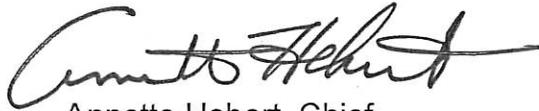

This Executive Order shall not apply to any A&A Corvette Performance Supercharger advertised, offered for sale, sold with, or installed on a new motor vehicle prior to or concurrent with transfer to an ultimate purchaser.

Marketing of the A&A Corvette Performance Supercharger using any identification other than that shown in this Executive Order or marketing of the A&A Corvette Performance Supercharger for an application other than those listed in this Executive Order shall be prohibited unless prior approval is obtained from the Air Resources Board.

No claim of any kind, such as "Approved by the Air Resources Board", may be made with respect to the action taken herein in any advertising or other oral or written communication.

Violation of any of the above conditions shall be grounds for revocation of this order. The order may be revoked only after a ten-day written notice of intention to revoke the order, in which period the holder of the order may request in writing a hearing to contest the proposed revocation. If a hearing is requested, it shall be held within ten days of receipt of the request and the order may not be revoked until a determination is made after the hearing that grounds for revocation exist.

Executed at El Monte, California, this 16 day of March 2016.

Annette Hebert, Chief
Emissions Compliance, Automotive Regulations and Science Division
